Exploring Value Engineer & Data Analyst Opportunities | MSc of Business Analytics at ESADE

Sant Cugat del Vallès, Catalonia, Spain

Summary

Currently pursuing an MSc in Business Analytics at Esade, with a strong academic foundation in Management Engineering (MSc, Alma Mater Studiorum, GPA 3.7/4) and Engineering/Industrial Management (BSc, Università degli Studi di Palermo). Academic and internship experiences have honed expertise in business analytics, sustainability solutions, and team collaboration. Recently contributed to sustainability initiatives at IrRADIARE, including developing local action plans and designing machine learning models to predict climate trends. Experienced in leveraging R, GitHub, and AWS, with a track record of facilitating cross-cultural collaboration and applying innovative approaches like gamification and design thinking to drive organizational engagement and productivity.

Experience

IrRADIARE

Project Management Intern

September 2024 - January 2025 (5 months)

Lisbon, Portugal

Developed 10+ sustainability initiatives for Aguedà's local action plan; presented quantitative findings to municipal leaders, informing strategic priorities for 2025–2030. Facilitated team ideation sessions on gamified engagement, enhancing collaboration in cross-cultural teams. Designed a ML model (using PCA and regression analysis) to identify and predict key trends in Climate Sustainability, collecting 30 sustainability indexes for 5 European Countries. Managed interns-employees collaboration Initiative in the workplace by implementing gamification through teambuilding activities; 80% of workforce showed interest in social work environment.

BIOMEYE SRL

Business Analyst Intern

September 2023 - February 2024 (6 months)

Conducted benchmarking and 20+ stakeholder interviews to identify engagement drivers in high-growth startups. Led 5-member consulting team designing a sustainable organisational system; projected to reduce turnover by 31% and increase productivity by 18%. Applied Design Thinking to map employee needs, building a point-based incentive system approved by the CEO. Created 5+ KPI framework (e.g. engagement variation, benefit usage, goal achievement, feedback rate) to track post-implementation impact. Pitched final project to CEO and employees of the 3 involved departments (HR, R&D, Marketing).
