MSc in Business Analytics @ Esade | Ex-PwC Financial Audit |
Python, SQL & R | Data-Driven Decision Making | Financial Data
Analysis

Barcelona, Catalonia, Spain

Summary

I am currently pursuing a Master's in Business Analytics with a professional foundation built on financial rigor and a current focus on building intelligent, automated systems. My career began at PwC, where I spent 2 years as an Audit Associate specialized in Financial Services. This experience gave me a deep appreciation for data integrity and risk assessment, but it also sparked my curiosity: how can we use technology to move from checking "what happened" to predicting "what's next?".

Today, I use Python, SQL, and Alteryx to bridge the gap between financial intuition and technical execution. I am particularly passionate about using Data Reasoning and AI to drive operational efficiency. I thrive at the intersection of finance, logistics, and technology, in environment where I can collaborate across teams to translate business needs into technical data solutions and Communicate findings effectively by turning complex statistical analysis into a clear story for stakeholders.

Experience

PwC

2 years

Experienced Audit Associate

August 2024 - September 2025 (1 year 2 months)

Istanbul, Türkiye
