Sara Fibla Salgado

Physicist | MSc in Business Analytics Student
Greater Barcelona Metropolitan Area

Summary

I am a curious and energetic individual with a strong foundation in both science and business. Currently pursuing an MSc in Business Analytics at Esade and a Bachelor's in Physics at Universitat Autònoma de Barcelona, I thrive in environments that challenge me to think critically and solve problems creatively.

My passion lies at the intersection of data, strategy, and financial decision-making. I have completed additional training in finance, communication, and quantitative methods through Harvard Business School and Coursera, preparing me for roles in consulting, banking, or analytics.

Outside of academics, I am passionate about financial markets, AI, and data science, and I stay active through music, sports, and volunteering. I bring a high level of energy, a collaborative mindset, and a real enthusiasm for continuous learning.

Experience

Océano Consulting
Software Developer Intern
January 2025 - April 2025 (4 months)
Barcelona, Catalonia, Spain

- Developed a software simulation project in Java for a fictitious company, focused on automating internal workflows.
- Implemented tools to optimize repetitive tasks and improve operational efficiency by a 50%.
- Led the technical design of the project, applying Java programming and process analysis skills.
