Sharath Raveendran

MSc Business Analytics at ESADE | Ex-Deloitte | Bridging Data, Technology & Product Strategy
Barcelona, Catalonia, Spain

Summary

I am an MSc in Business Analytics Candidate at ESADE, leveraging my deep technical background in Cloud and Analytics to bridge the gap between data strategy and business execution. As a Deloitte Alumnus (4 years), my client-facing role focused on leading complex Digital Transformations for a major Asset Management organisation. I specialised in technical leadership, including spearheading database migrations, engineering high-capacity backend enhancements, and deploying AWS micro-services (Java/Python). I am actively targeting Software Engineering, Analytics, and Product Management roles that leverage my cloud, analytics, and development expertise to bridge technical execution with business strategy across the European market.

Experience

Generalitat de Catalunya

Student AI Strategy Analyst

February 2026 - Present (3 months)

Barcelona

- Conducted a capstone project with the Centre de Telecomunicacions i Tecnologies de la Informació (CTTI).
- Focused on the exploration and responsible deployment of Agentic AI within public administration.
- Collaborated with stakeholders to ensure alignment with the Generalitat de Catalunya's objectives.
- Developed insights on AI strategies to enhance public service efficiency and effectiveness.

180 Degrees Consulting

Analytics Consultant

October 2025 - Present (7 months)

Barcelona, Catalonia, Spain

Collaborating with a cross-functional consulting team to design a Supplier Warning System, leveraging Natural Language Processing (NLP), information retrieval from global news APIs, and real-time data modelling to detect and visualise potential supply chain disruptions.

Deloitte

3 years 11 months

DC Consultant

May 2025 - July 2025 (3 months)

Bengaluru, Karnataka, India

Focus: Strategy, Leadership, and High-Value Delivery

Client-Facing Advisory: Advised client management on the multi-year modernization program, client-facing daily to drive strategic alignment and deliver a 20% reduction in infrastructure costs.

Technical Leadership: Led the database migration (on-prem to AWS Aurora/DMS), ensuring technical governance and zero post-go-live issues on a critical system.

Conducted mentoring sessions and workshops for 10+ members across internal and client teams, improving cloud tool adoption and team expertise.

DC Analyst

September 2021 - May 2025 (3 years 9 months)

Bengaluru, Karnataka, India

Focus: Execution, Process Management, and Cloud Development

Agile & Stakeholder Management: Orchestrated Agile sprints and cross-functional teams, ensuring alignment among 10+ stakeholders and guaranteeing service delivery against all SLAs.

Cloud Development: Developed and deployed high-efficiency AWS microservices and Lambda functions (Java/Python).

Implemented a cloud-native file share architecture using Java/Python SDKs across 6 AWS services for secure data exchange.

Automated creation of data resolution processes via AWS Lambda, eliminating up to 1 week of duplicative effort; Recognised with two Deloitte Applause Awards.
